Overview

With DrawCut PRO you can comfortably control your cutting plotter, use LAPOS XPT the most extensive multi-registration mark recognition system in the world and you can also professionally create your plot files - with many special functions such as text on path, drop shadows, merging fonts, drawing stars and arrows as well as an extensive vectorization function for bitmap graphics and much more. This makes you independent of applications such as CorelDraw, Adobe Illustrator and others. DrawCut PRO is also available as an upgrade from DrawCut LITE. DrawCut PRO supports many common cutting plotters from well-known brands. After the order process, you will receive a code with your invoice which you can use to download your DrawCut PRO from http://buy.draw-cut.com/?edition=2. Payment is made by "voucher" with the code that you will find on your invoice. You will then receive your DrawCut PRO serial number by email, which you can use to download and install DrawCut PRO from www.draw-cut.com. Software products are generally excluded from being returned.
