

TM

Overview

The TM1 cup press by Secabo is ideal for conveniently performing sublimation transfers on ceramic cups and similar objects. The Secabo TM1 transfer press is suitable for beginners as well as for professional users and can be operated quickly and safely with its digital controller. The contact pressure can be easily adjusted via a handwheel. Optionally, there are 3 different heating elements - also in conical design - available. Included in delivery is the cup press Secabo TM1, including a heating sleeve for cups with 75-90mm diameter (heating elements are wear parts). We also recommend turning on the mug press for actual use only and not heat it continuously.

Features

Digital controller

Duration and temperature can easily be adjusted and monitored using the digital controller.

Variable work pressure

The work pressure is easy to adjust - in each case matching the transfer object and procedure.

Safe working

The safety and quality of this device is constantly monitored - according to German safety standards.

Exchangeable heating sleeves

Exchangeable heating sleeves available - in several diameters, also conical.
