System

Overview

This modular product has the following content: 2 x Secabo Crosslaser Basic Unit | 1 x Secabo Accessory Holder | 2 x Secabo 500mm Rod | 1 x Secabo Fixed Joint Unit | 1 x Storage Tray | 1 x Secabo Screws Bag for Transfer Extension Modules + Quick Change System for LITE and SMART Series* *The Secabo Quick Change System may vary by press model, is not included! Do you actually know how easy it is to use the new Secabo cross laser? For example, the double cross laser you can attach directly to your heat press! With the Secabo Accessory Holder - it easily attaches to our quick change system and then you have the fantastic option of attaching your laser to it. This of course works with almost all Secabo heat presses, such as the Secabo Smart models of the TC7, TC5 or the Secabo TS7. With the double cross laser version, which is attached directly to the transfer press, has possibility to simply attach a second laser basic unit via a cross bar to achieve even more precision. With the 500mm long rod you can reach a larger area, so you can your textile, for example, on the chest and the edge. Here, of course, it helps to use a second laser and reduce the amount of work. The decision is of course yours, we make it possible! You can also easily attach the practical storage plate, the Secabo Storage Tray to your heat press. Whether small tools such as cutters or scissors, as well as your transfers can be stored here. Thus, the most important things for your workflow are always at hand and sorted. All products of the Secabo cross laser system can be extended on request and according to your needs. Secabo cross laser modular accessory system for transfer presses For even more flexibility and precision in hot transfer: a cross laser suitable for all Secabo transfer presses! The new modular cross lasers from Secabo offer you unprecedented convenience in textile finishing. The Secabo cross laser system can help you, for example, to optimally position the desired transfer objects and to achieve consistent results with higher print runs. With Secabo's flexible cross lasers, textiles and other objects as well as transfer elements such as flex foils, sublimation papers and the like can be positioned easily and reproducibly. Secabo has developed a modular system here that is suitable for almost all Secabo transfer presses. Whether you want to use the table version, stand version or in combination with our Accessory Holder the laser directly at the transfer press. Here your possibilities are extremely variable, because by the different bar lengths and cross bars you can adapt everything to your workplace accordingly. The new laser can be focused even more precisely, which is particularly interesting for hot transfers in series production, as it makes it much easier to position the transfer objects exactly in almost all transfer press types. Like all Secabo products, these new products have been tested in accordance with current safety standards and come with a 24-month warranty. Features all transfer presses can be retrofitted with the cross laser system modular design for optimal workflow more precise positioning due to exact laser focus desk and floor standing version available Safety instructions! Do not look into the laser beam Do not look into the direct reflections of the laser beam Do not use at eye level.
