

Overview

The SC30 E sheet cutting plotter from Secabo automatically cuts out contour-precise stickers and similar objects from sheets up to a maximum size of 330mm x 488mm. In doing so, the SC30 E reliably pulls in the individual sheets automatically from a stack of up to 40 sheets – depending on the material. Many printable self-adhesive materials such as paper or foil can be used. The maximum contact pressure of the cutting system of up to 500g also allows cutting of laminated prints. User intervention is not required. The SC30 E sheet cutting plotter is the ideal machine for reliable and automatic production of contour-cut stickers and labels in copy store, product marking, office applications and much more. Compared to its big brother Secabo SC30, the SC30 E works with a stepper motor and is therefore extremely attractively priced. Fully automatic contour-cutting of stickers and labels from sheets up to 330mm x 488mm ideal for the production of short runs of individual labels, product marking, office applications or for copy shop easy creation of registration marks in DrawCut PRO. Quiet desktop machine, ideal for office environment. DrawCut PRO for Windows included in delivery.

Technical Data

interfaces	USB, LAN, USB stick
countour cutting function	LAPOS, sequential cut marks, light barrier
scope of delivery	Sheet cutting plotter, multilingual cutting software DrawCut PRO (Windows), drag knife, ball-bearing knife holder, plotting pen, connecting cable, user manual in German language
power supply	175W, 230V, 50Hz
environment	5°C - 35°C, up to 50% humidity
max. thickness	0,5 mm
motor	stepper motor
downforce	50g - 500 g
control	backlit graphic touch LCD graphic display
Max. cutting speed	300 mm/s
dimensions	685mm x 500mm x 320mm
Max. sheet size	483 x 330mm
weight with package	54,00 kg
Brand	Secabo
